Well hello everyone! For those of you who have received my newsletters in the past I am sure you are wondering what happened to them. And for those who are receiving it for the first time I hope you enjoy. Things have been changing and very busy, hence the reason for the newsletter getting off course. This is a new format for me for presenting the newsletter so any comments would be greatly appreciated.

I hope you are all prepared to enjoy the summer weather and relax a bit. This past weekend we got all the gardens in perfect order, swept out the shed and tidied up around the yard. Boy, what a great feeling to have everything in order so I can sit down and relax with friends on the patio. We have many plans for renovating and decorating this summer which is very exciting.

So all that being said, I know how it is to get overwhelmed and behind, but the key is to know how to handle it and have systems in place to lessen the time involved in getting back on track. This is a very busy time of year! When you are feeling overwhelmed, disorganized, or are having design dilemmas, give us a call. We are here to help you get done what has to be done and get on with enjoying what you like to do in life.

*"We organize and beautify your home and office,
so you can spend more time doing what you love!"*

The past year has been very busy for me and a growing experience in many ways. I am the co-founder of Women of Today Networking and Magazine. Women of Today presented many learning opportunities and a very busy year in 2006. As things grew very fast with Women of Today, it was time for me to give my part of the business over to Sherry Simoes. Women of Today is growing right across Ontario and I am very proud to have been part of the beginning. I am still very involved with the Networking group in Lucan and also helping Sherry make the transition. To find out more about Women of Today, check out the web site at www.womenoftodayinc.ca

So, **Just In Time Solutions** is growing leaps and bounds also. Bonnie and I are having a great time. Bonnie has been busy taking courses on organizing, business marketing, Auto CAD and just recently redesign and home staging. Bonnie is now certified for Redesign and Home Staging, please join me in congratulating her in all her hard work. When you are frustrated with how your home looks, give Bonnie a call.

I have been busy changing marketing plans, speaking at Lunch and Learns, different groups, and teaching seminars on Organizing. Speaking is a passion of mine and would love to speak for your group. Also you will see on our website many new updates as well as organizing products you can purchase.

We are excited about going to the next level and offering many more services along with more experience. We would like to let you know that as of June 30th, 2007 our hourly rate will be increasing. For those of you who have been clients in the past and are currently clients the hourly rate will stay the same until September 30th, 2007 and then the new rate will be in effect. For those of you who have not used our services and would like to take advantage of the old rate, please call and book your time before the 30th. Thank you for your continued loyalty.

What is Redesign?

Redesign is a way to reuse, rearrange & re-purpose your existing furniture, accessories and artwork to transform your home all within a day. By utilizing your current pieces it saves you from making expensive furniture purchases, and saves the environment by reusing what you have.

In a few short hours you can be coming home to a new look!

Credibility, Community & Connections

**Professional Organizers in Canada connects the public with Professional Organizers,
and brings together organizers from across Canada to build and strengthen the
whole industry**
